

CANADA FOUNDATION FOR INNOVATION

The research Infrastructure ecosystem and data:

How to effectively link cyber infrastructure and data?

ICRI 2018, Vienna

—

A few words about us

21 years ago

Today

The background of the entire slide is a dark, blurred image showing several hands cupped together, holding a collection of colorful maple leaves in shades of yellow, orange, and red. The lighting is soft, creating a warm and collaborative atmosphere.

Mandate

**TO BUILD OUR NATION'S CAPACITY TO
UNDERTAKE WORLD-CLASS RESEARCH
AND TECHNOLOGY DEVELOPMENT THAT
BENEFITS CANADIANS**

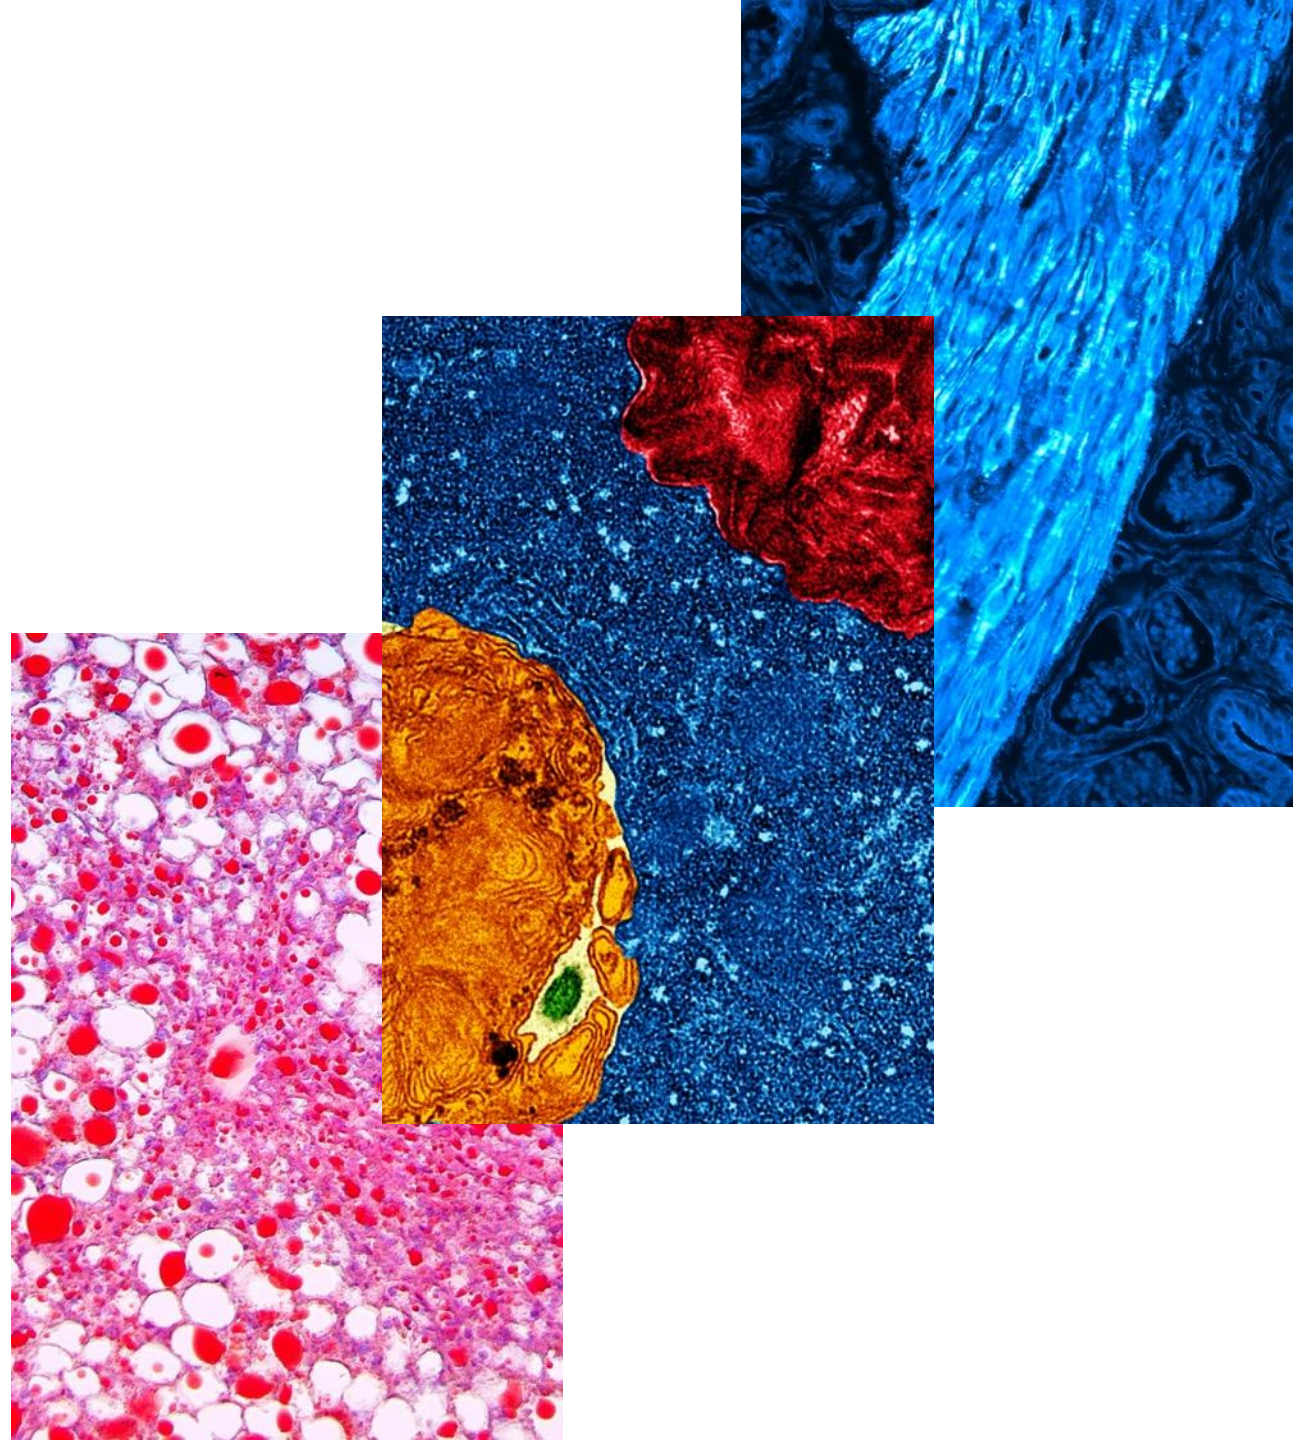

INNOVATION.CA

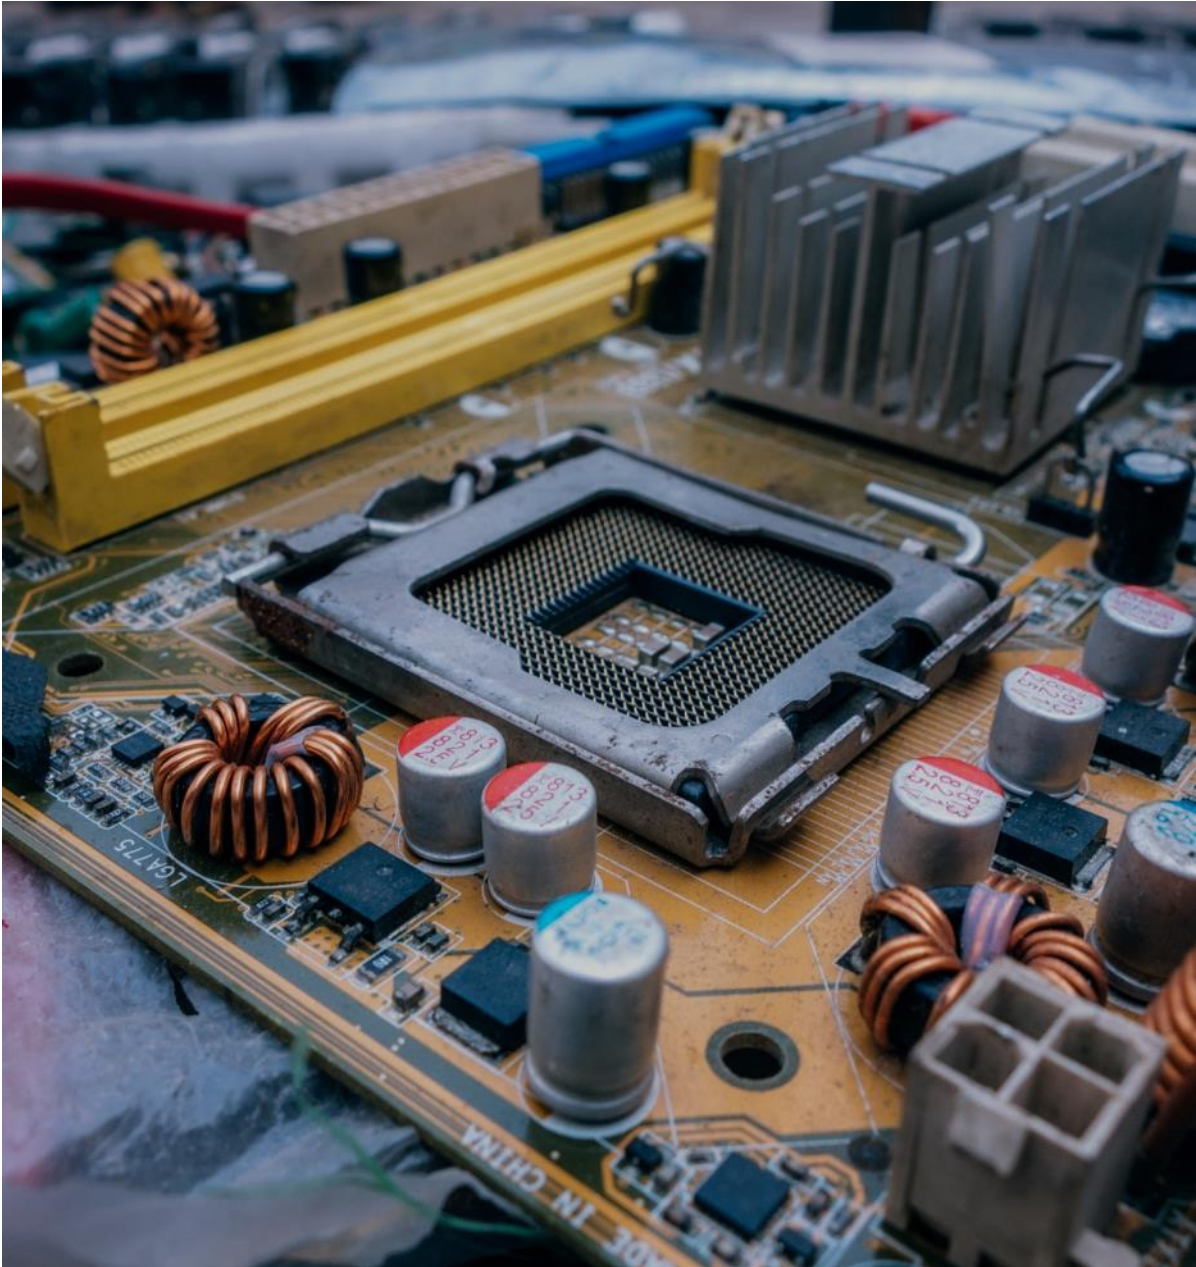

A unique funding model

CFI provides 40% of infrastructure costs (remaining 60% provided by provinces, institutions and private sector)

Over 21 years, CFI has invested over \$7 billion in research infrastructure, generating over \$17 billion in overall investment

Highly competitive funding requiring excellence and institutional commitment to maintaining the infrastructure for its useful life

Program structure

Research infrastructure

- John R. Evans Leaders Fund (JELF)
- Innovation Fund
- College-Industry Innovation Fund
- **Cyberinfrastructure Initiative**

O&M support

- Infrastructure Operating Fund (IOF)
 - Major Science Initiatives Fund (MSI)
-

The Cyberinfrastructure Initiative

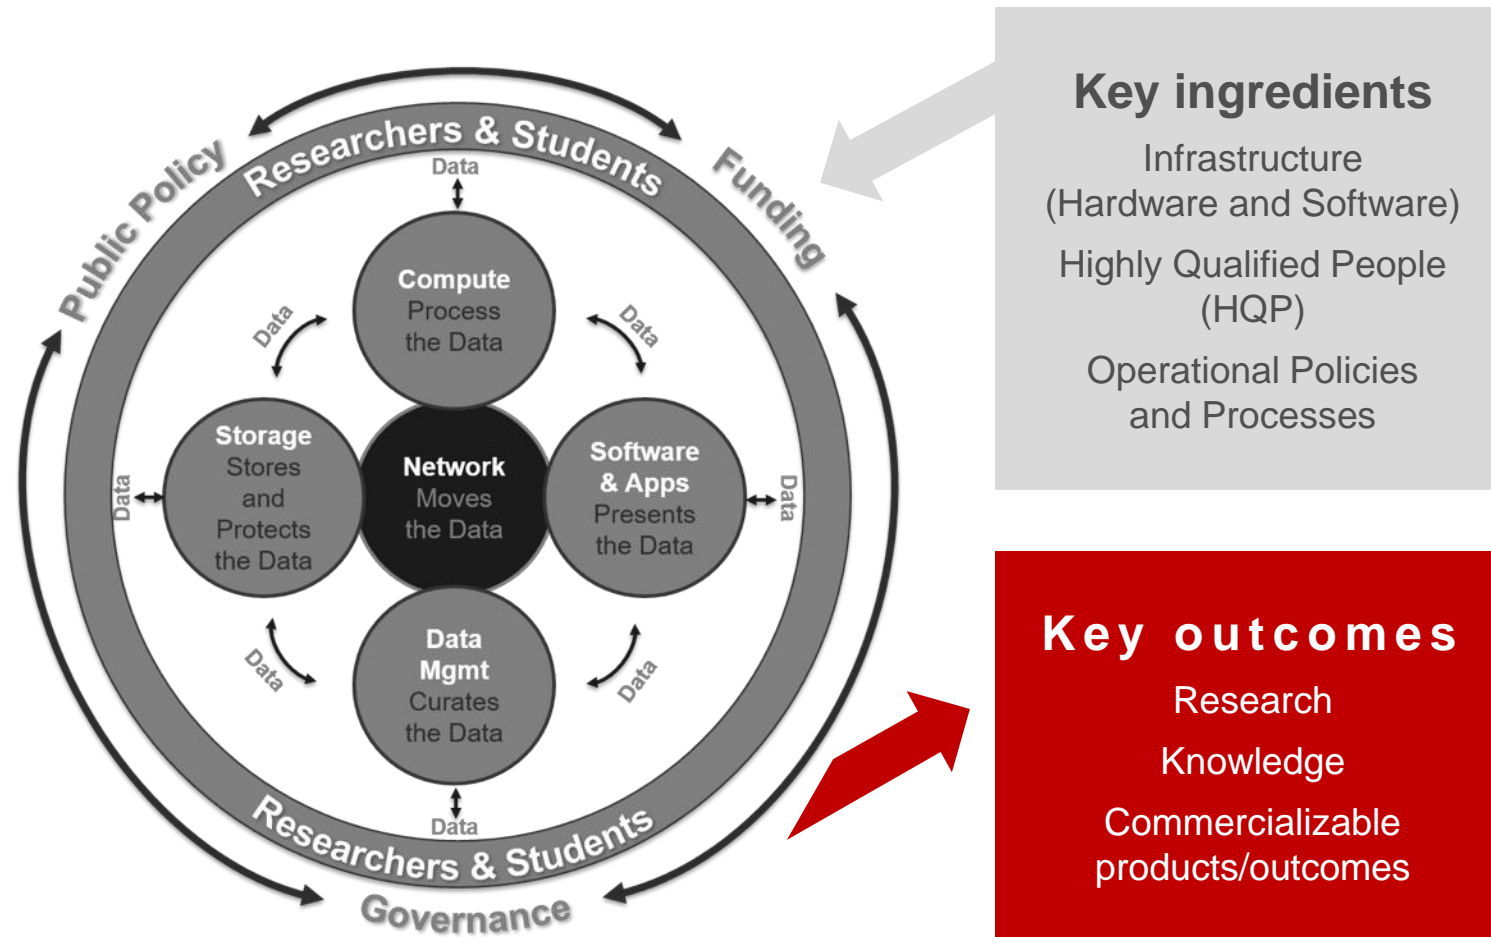

INNOVATION.CA

**TO SUPPORT RESEARCH DATA INFRASTRUCTURE
PROJECTS THAT CREATE TAILORED, SHARED AND
INTEGRATED DATA RESOURCES CAPABLE OF ENABLING
LEADING-EDGE RESEARCH ON SIGNIFICANT
SCIENTIFIC, SOCIAL AND ECONOMIC QUESTIONS.**

INNOVATION.CA

Digital research infrastructure (DRI)

DRI conceptual model

DRI and research data management

“...elements required to perform data-intensive and computationally-intensive research and data management...”

“complex ecosystem”

requires and produces digital assets

Similar data lifecycle and data workflows

Share includes “dark” storage of raw or processed digital assets

KEY QUESTIONS

How best to ensure data quality and reliability?

•

How to design and implement data management systems that can be trusted?

•

What the impact will be on both present and future research infrastructures and data producers?

The cyberinfrastructure initiative

Projects submitted should bring together a **community of researchers from across the country** who share similar challenges linked to the availability of research data.

Projects should **address an existing or emerging challenge for this community** through the **development of new tools and applications or novel ways of organizing and using research data** that would enhance the community's capacity to conduct leading-edge research.

INNOVATION.CA

The cyberinfrastructure initiative

Consortia

Tailored,
shared and
integrated data
resources

Emerging gaps or challenges

**Community of
researchers**

**Enhance leading-edge
research**

Adopt, adapt & develop

CFI | ICRI 2018

Current, future and emerging challenges

- Optimal use of research data infrastructure (DRI) and the role of funding agencies in mobilizing research communities and in applying effective data policies;
- Long term strategic planning for a sustainable DRI ecosystem;
- Bridging the different scientific communities with technical expertise required to advance knowledge;
- The global shortage of talent in data highly qualified experts.
